

## Car 59

This car is our multipurpose car. It has raced as a TAD car, Supercharged Outlaws and even as a normally aspirated DYD car. This car is equipped with provisions for both hand brake and foot brake as well as clutch linkage and LENCO or B&J shift valves and a POWERGLIDE shifter as well. It needs to be pointed out that it is already bracketed for front brakes as well, although they have yet to be installed. It has both a single parachute and a dual chute set up. This car is used as our Graduate School car as well as being used for a bit of fun going Supercharged Outlaws racing too.

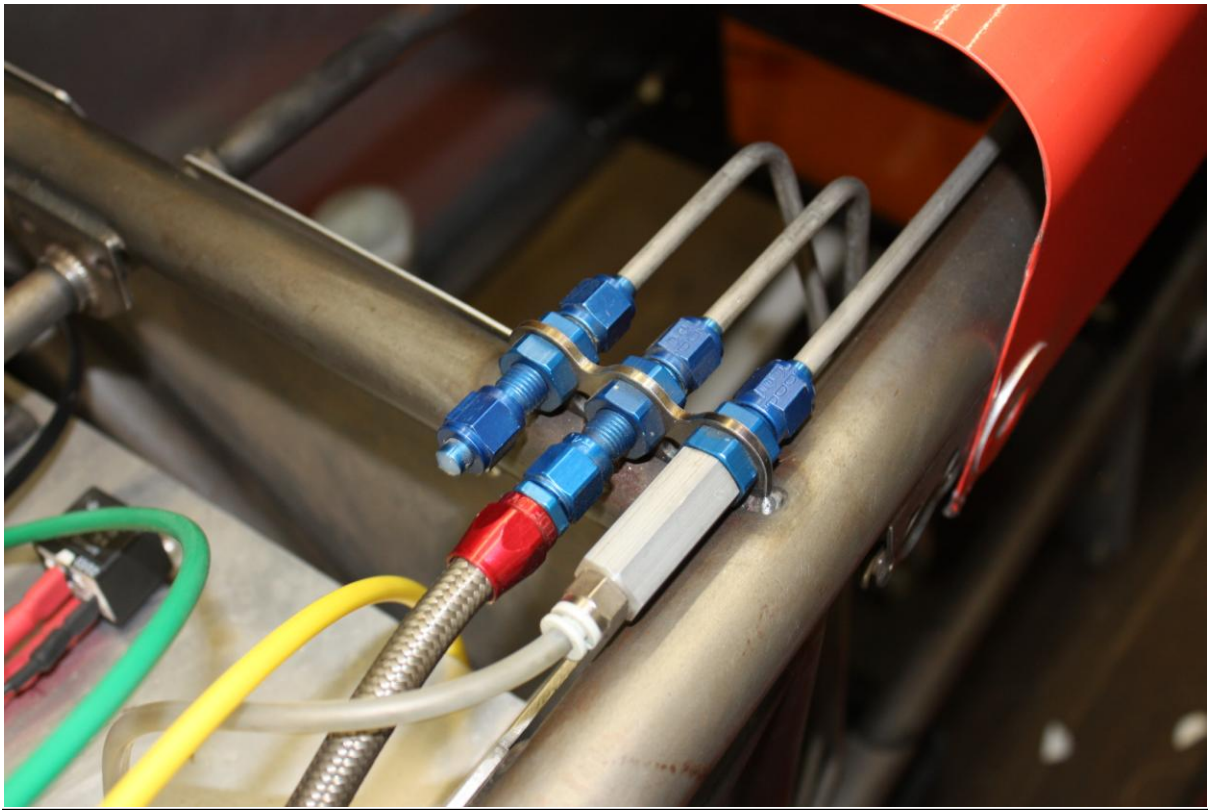

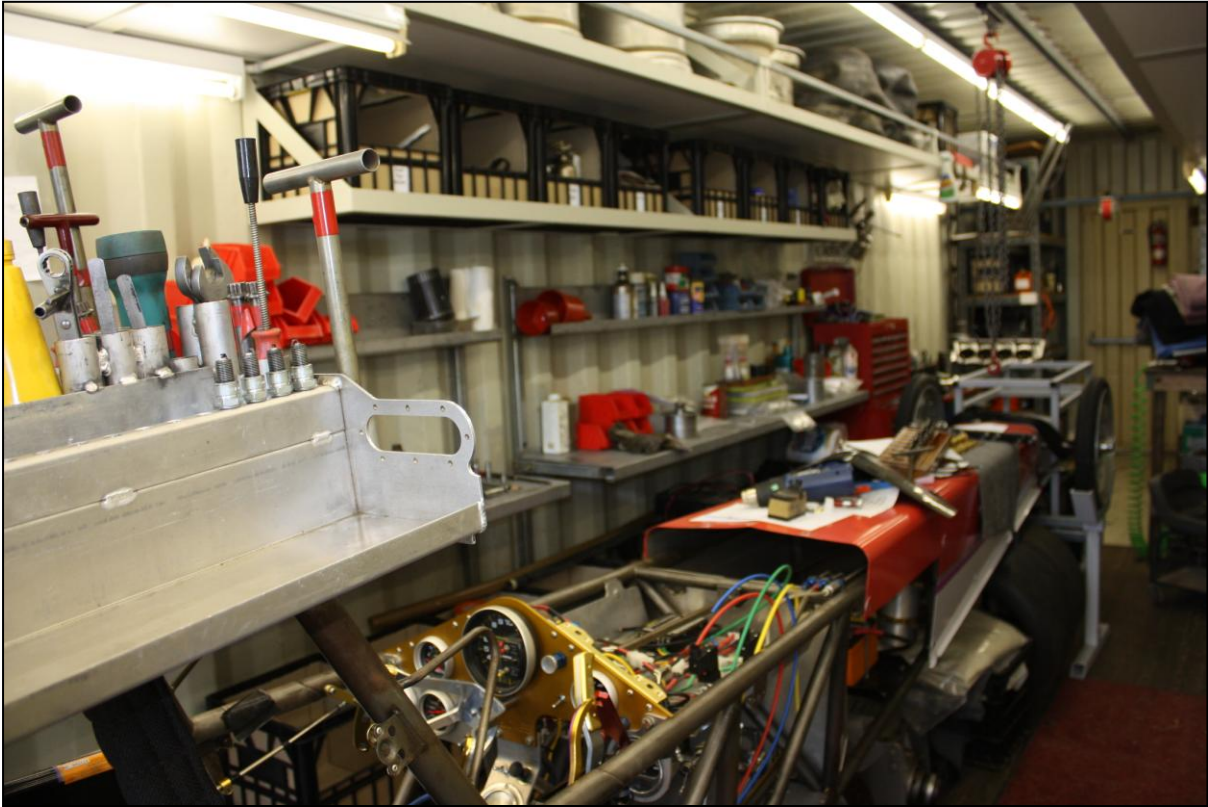

Chris Stipanovich just finishing licensing  
in the Graduate School Program ready for  
his Top Fuel Funny Car licensing

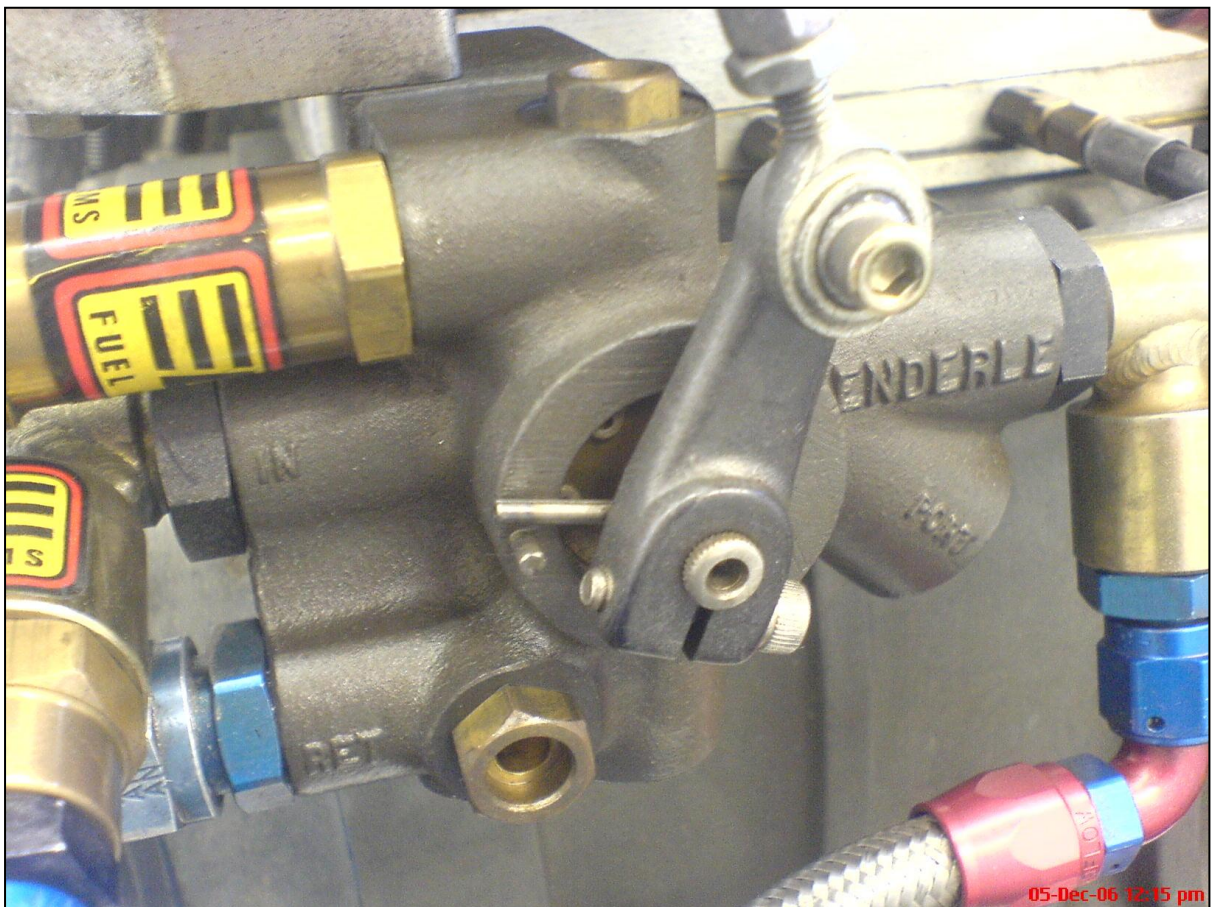

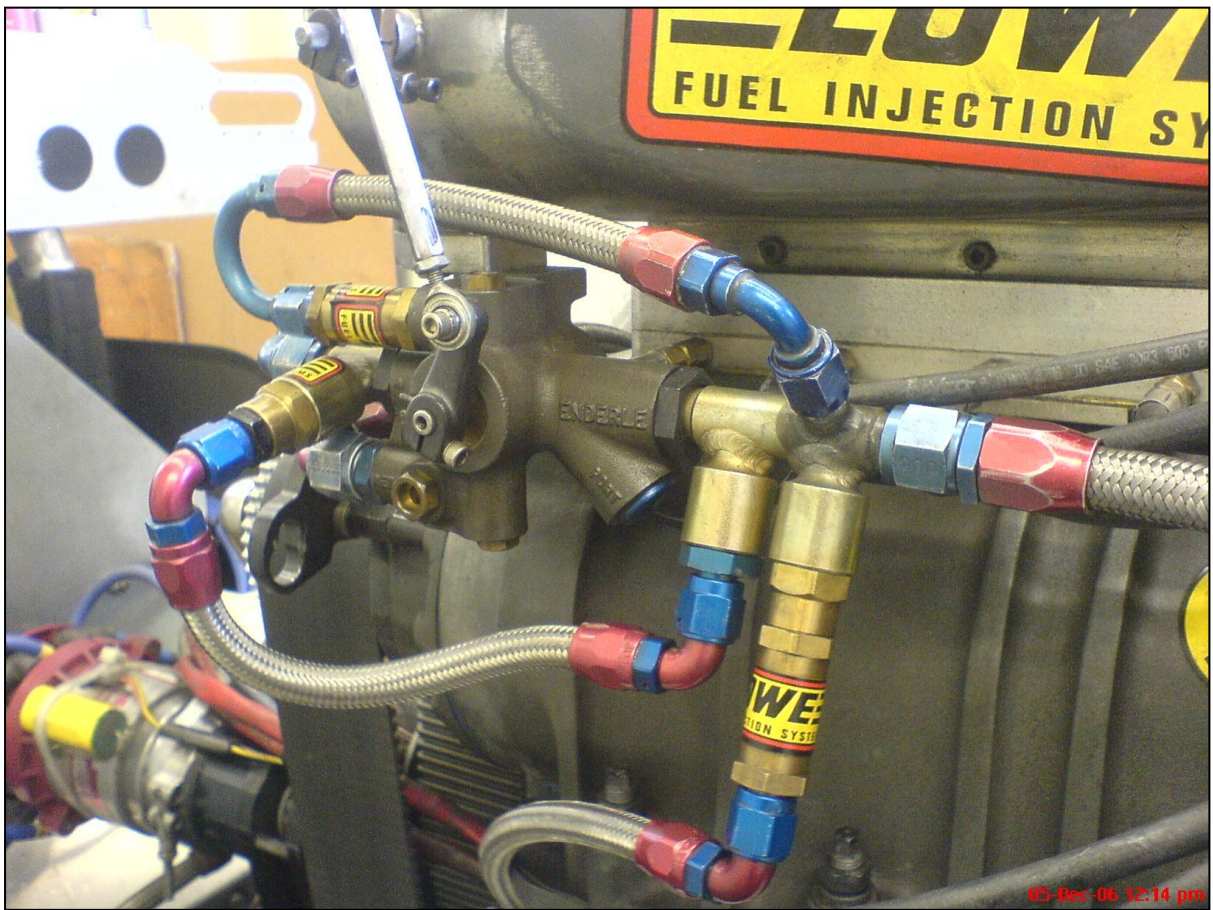

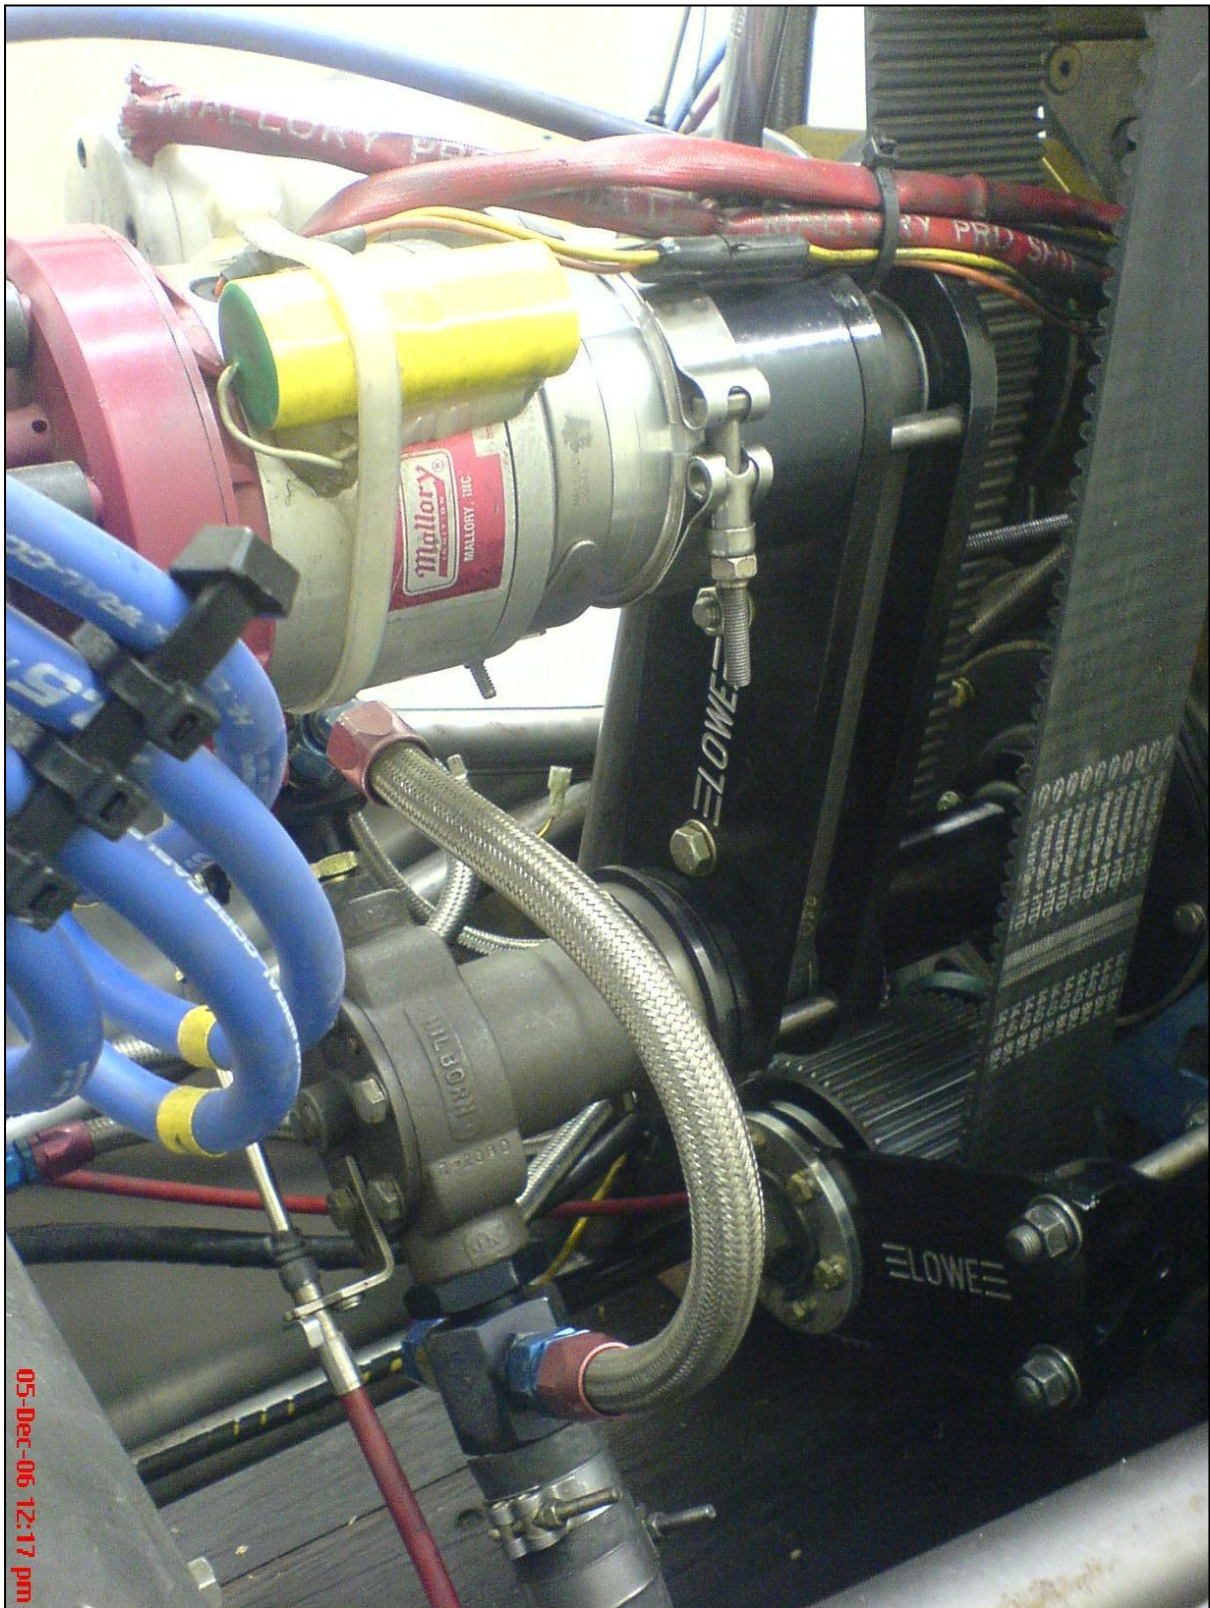

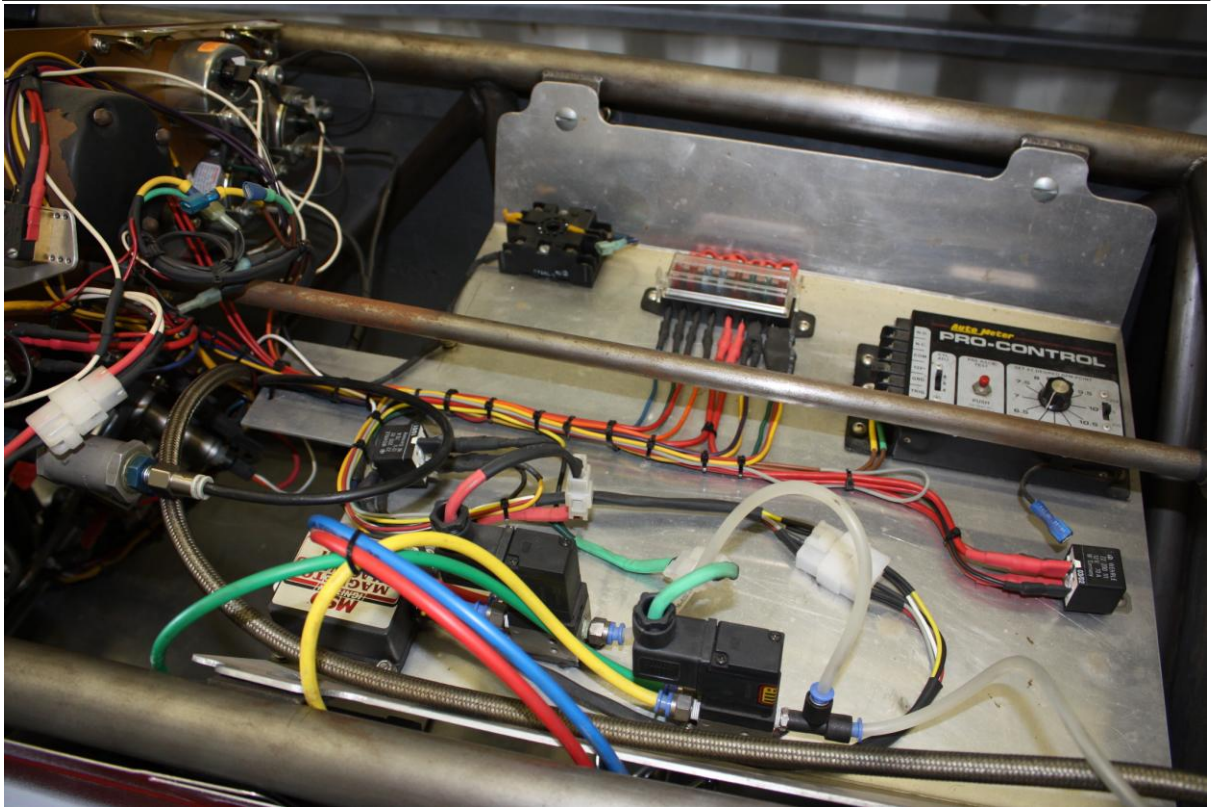

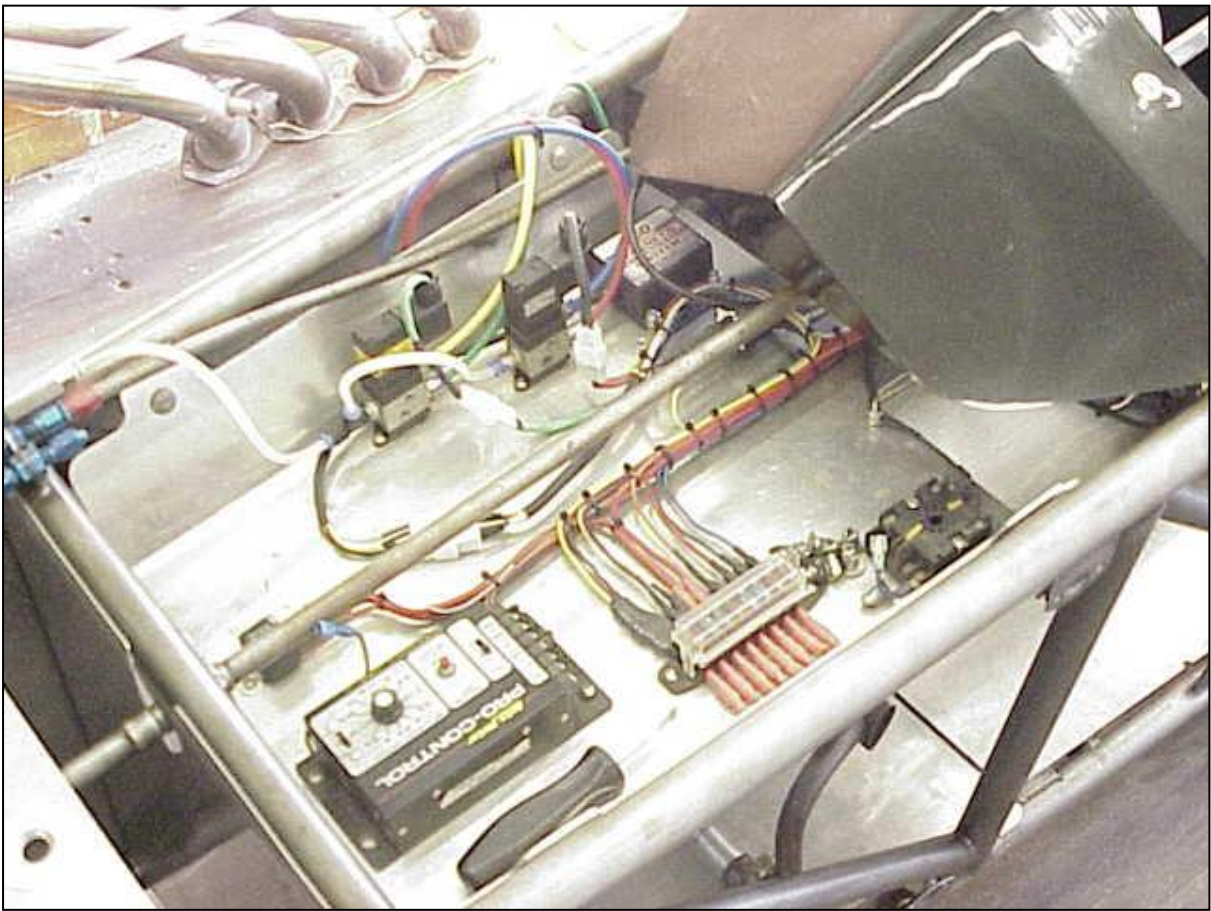

**Twins - Car 58 and 59 side by side,  
so identical even the  
body panels interchange.**
