

Oil Filter Adapter Massey Ferguson TE-A20 Petrol Engine (Gasoline)

Never again will you have to clean out the oil filter canister when changing oil filters. Unscrew one old dirty filter and screw on a fresh new clean one.

Complete kit includes filter mount, engine adapter and all bolts, O-rings, gaskets and includes a FORD screw on filter.

You must use the original oil pressure regulator that was in the factory canister oil filter mount. This means you will not change

the oil pressure setting on your tractor.

"Your tractor will love it"

Complete kit with instructions

PN 41350-00001

Fits TEA-20 Petrol engines.

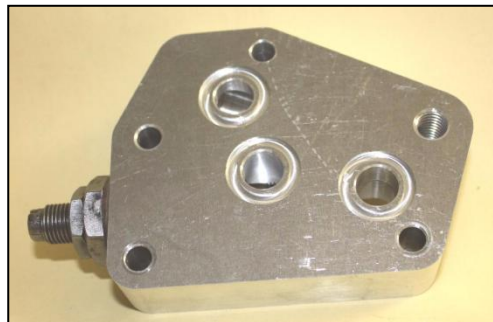

USE most popular filter on the planet- same as FORD V8 and many other applications.

Ryco Z9 (\$7.99 Supercheap)
