

Steering Shaft CO2 Swivel

Put your controls at your finger tips. On some cars like Funny Cars and Altered's there is no "dashboard" that you can reach with your fingers to activate certain controls. Many racers will put the shift buttons on the steering wheel and wrap the plastic hoses around the steer column. It makes an unsightly mess and is easily tangled. This is a complete steering column assembly for a Funny Car or Altered with the CO2 Swivel built in. This provides for up to three controls on your steering wheel without the twisting pile of hoses and wires going to the steering wheel. The three connections allow for two gear changes, a steering wheel mounted CO2 activated ignition switch or a CO2 activated parachute and or fuel shut off as well. This way you don't have to take your hands off the steering wheel while the car is moving. Replaces steering shaft and bolts to top of steering box and to the steering wheel. Provide length you need for your car and we can make one up for you.

Part Number 23732-10004 Steering swivel kit 4 port \$1500.00+
