

Blower Starter Hardware

Note the starter rotation difference between the style 1 and the style 2 crescents. Style 2 rotates the starter further around clockwise. This difference is usually not important on straight on starters but may be important on offset starter applications to keep the starter away from the barrel valve.

- 82197-23031 Starter crescent kit (3 hole) with stands \$ 275.00+
- 82197-23031 Starter crescent only (3 hole) \$ 155.00+
